## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-33 are rejected under 35 U.S.C. 102(e) as being anticipated by Klimko et al. (US 2004/012250 A1).

Klimko teaches a computer program and method for modeling and generating welds and weld data from sets of wire bodies (paragraph 63) wherein attributes are tracked (figures 3-7 and paragraphs 30-36). A shape manager (geometric parameter) is used (paragraphs 37, 41 and 42). First and final data sets are represented (paragraphs 38 and 52-56). A machine-readable article comprising method steps is also taught (paragraphs 53-59).
